

Why screen botanicals for pesticides?

The top GMP violations (483s) issued by the FDA to dietary supplement companies have been for lack of appropriate specifications. 21 CFR §111.70 requires dietary supplement manufacturers to establish specifications for limits on contamination for your products. While the exact specifications are up to you, the FDA has clearly demonstrated through enforcement, that pesticide residue screening cannot be overlooked. SORA Labs offers pesticide analysis via our state-of-the-art GC/MS instrumentation. We're equipped to meet all of your pesticide screening needs.
